SECOND.... Getting Rich Slow

Everyone wants to get rich faster, but it takes patience, focus, attention and perseverance to truly create wealth. People see \$20,000 checks posted on FB and their eyes light up with dollar signs. Instead of taking the time to learn the business, their craft and how to build relationships they throw their hands up and surrender.

Take a moment and watch "The Story of Health Alliance Network" video above. It all started with an idea in 2016 and then with 1 customer in 2018, then another customer and another and another. In late 2018 we began bringing others in to represent our products and services. (Agents) We had built a complete platform in a vertical and sustainable business that allows others to sell subscriptions to our network of physicians, dermatologist and behavioral health counselors. Imagine what it takes to build a nationwide network for healthcare and then hand it off to others. Health Alliance Network in partnership with all of you has one of the greatest opportunities to build wealth in an absolutely exploding healthcare marketplace.

Why am I telling you this instead of going to the beach today? Two Reasons.

- 1: I wouldn't know how to enjoy the beach in such a great business environment, I couldn't relax for a moment.
- 2: Most importantly, I want you to succeed. I want you to become a true professional in this business. The true professionals will not only succeed, but thrive in this market and everyone else will go by the wayside.

True Professionals choose to "get rich slow"

When you choose to "get rich slow", you choose to build a strong, solid foundation of skills, experience, contacts, and confidence, and of course a lifetime of income for you, your family and your legacy.

I truly hope you will be one of these professionals, that you get rich slow but get very rich and succeed beyond your wildest dreams. What you choose to do with your wealth is up to you. Homes, Cars, Vacations and my personal favorite "philanthropy".

Thoughts? Agree or Disagree, drop me a line.
